Effectivess comparison report

Raphael Rodrigues Campos January 17, 2016

Experimento

Utilizei o executável tcpp compilado pelo Thiago Salles que estava no pacote que ele enviou no último email.

Para cada um dos datas et eu rodei cross-validation~10-folds. Para comparação dos métodos foi utilizado test t com correção de bonferroni. Os valores em negritos representam os vencedores e são estatisticamente significantes.

Resultados
